

BOARD CERTIFICATION VERIFICATION INSTRUCTIONS

To verify Board Certification for a DO:

<https://certification.osteopathic.org/>

Click on "For Patients"

Then enter Zip Code and click on "Go"

You get a list of providers within this criteria. You can go through the list to find your physician or narrow down the results by specialty or even name.

If the provider has a "👉" next to their name, then they are Board Certified by the AOA.

However, some DO's are board certified through the ABMS. When you click on their name it will state "Learn about Dr. X's non-osteopathic board certification". If you click on "board certification", it will take you to the ABMS certification website page.

From there, you enter in the Last Name and First Name of your physician and hit search.

The search is free, but you must register to get this information.

To verify Board Certification for a MD:

<http://certificationmatters.org/>

Enter in the Last Name and First Name of your physician and hit search.

The search is free, but you must register to get this information.
